

Year 2 – Mechanisms – Autumn 2021

The Year 2 children, in Design Technology lessons, have been exploring different toys, structures, bridges and how they move. They used their imagination to design a bridge and write a plan for their ideas. The children were able to discuss which materials they would use when creating their model and explored how to join, fold and roll materials to make sure their structure was secure and sturdy. They were able to discuss and evaluate their final model.
