

Year 6 – Market Research – Spring 2022

The Year 6 children, in Design Technology lessons, have been using market research to inform their plans and ideas. They were able to use the research and develop the design to ensure their product was innovative, functional and appealing which fit a specific purpose. They have become designers and worked extremely hard to create their own Anderson shelters. Each and every Anderson shelter was hugely creative, with some of the children even using resources from our school courtyard to make their shelter look more realistic.
