

Year 1 – Tennis – Spring 2, 2022

Year 1 started their Tennis unit by practising the skills needed to send and receive the ball. They then moved onto exploring different ways to move with the ball. They looked at basic control and accuracy when hitting the ball and they applied these skills and tactics in simple games.

This is a racquet, not a bat.

The children watched a tennis game online so they had a context in which to build their learning. After this session they discussed how tennis is a competitive sport played either as singles or as doubles. They looked at how the racquet was held correctly before having a go themselves. The children are looking forward to applying the skills learnt when they partake in a tennis session in the summer term, delivered by an LTA coach.

We are practising hitting the tennis ball.

The ball is only allowed to bounce once.
